This third volume in the *Oxford English Dictionary: Additions Series* presents a selection of approximately 3,000 entries and subsenses not previously included in the *OED*.

The principles followed in the preparation of this volume are identical to those used in preparing Volumes 1 and 2. Again, the material is not confined to a particular alphabetical range, permitting a new entry to be included in any volume rather than having to wait for its turn in a publication cycle, and allowing related entries which are alphabetically distant to be included in a single volume. In each volume, however, there are concentrations of entries, reflecting the recent work of the project. In Volume 3, the bulk of the entries lies in the ranges *A-C* and *K-O*, and derives from the systematic analysis of the *OED*'s quotation files (paper and electronic). Other entries reflect the *OED*'s role in providing fully researched new entries for the range of dictionaries produced by the Oxford University Press, notably in this volume the *Oxford English Reference Dictionary* and the *Concise Oxford Dictionary* (ninth edition).

A cumulative index of volumes 1, 2, and 3 is included at the end of this volume.

The Editors would as ever be delighted to hear of suggestions for words or senses which might be treated later in the series.
